

## STATIC GROUNDING REEL

**12**  
MONTHS  
MACNAUGHT  
WARRANTY

The Retracta Static Grounding Reel keeps 15m of high-visibility orange coated steel cable tidy, protected and ready to use. A piercing clamp bites through paint, rust and grime to make a reliable earth connection on tanks, trucks, aircraft and utility vehicles. When the job is done, it winds back slowly so it never whips or tangles. It gives operators a fast, repeatable way to discharge static before and during transferring fuel or flammable liquids.

### CONTROLLED SLOW RETRACTION

Spring-driven rewind returns the cable smoothly, protecting operators, paintwork and the clamp from whipping back unsafely.

### 15M REACH

Ground trucks, tanks and aircraft from one fixed point, without moving the reel or the vehicle.

### HIGH VISIBILITY ORANGE CABLE

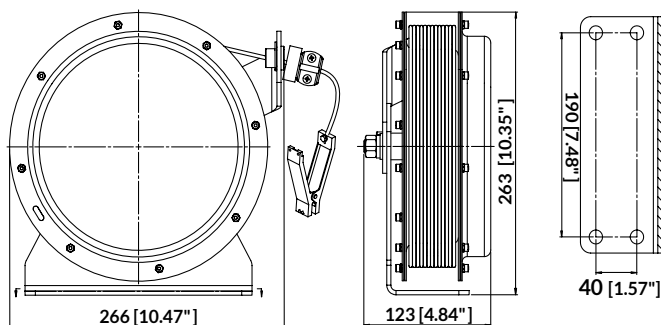

Easy to spot on busy work areas, reducing trip hazards and the risk of driving off while still connected.

### PIERCING CABLE CLAMP

Teeth cut through paint, rust and dirt for a dependable metal-to-metal connection, even on weathered surfaces.

### TECHNICAL SPECIFICATIONS

|                        |                                 |
|------------------------|---------------------------------|
| Part Number            | RSR25150-P                      |
| Cable Material         | Flexible Coated Steel Cable     |
| Steel Cable Diameter   | 2.5mm (3/32")                   |
| Outer Coating Diameter | 4.0mm (5/32")                   |
| Cable Length           | 15m (50ft)                      |
| Cable Colour           | Orange                          |
| Clamp Type             | Piercing Static Grounding Clamp |
| Installation Height    | ~2m (6.5ft)                     |
| Operating Temperature  | Up to 52°C (126°F)              |
| Retraction Type        | Spring Driven Slow Retraction   |
| Product Weight         | 7.3 Kg                          |

### FEATURES AND BENEFITS

- **Compact Design** – A robust, space-efficient design for permanent installation. It keeps the cable off the ground, clean and ready for the next job, for a tidy, professional site.
- **Flexible coated steel cable** – A 2.5 mm steel core resists kinking and stretching, while the 4.0 mm outer coating protects it from everyday wear.
- **Powder-Coated Finish**: Helps protect the steel reel body from everyday exposure.

### PRODUCT APPLICATIONS:

Retracta Static Grounding Reel is ideal for:

- Refuelling stations
- Fuel tanks
- Maintenance workshops
- Aircraft static grounding

### PACKAGE INCLUDES:

- Retracta Static Grounding Reel with Piercing Grounding Clamp.
- Reel mounting template (printed on the box).
